

Download A Life In Error From Little Slips To Big Disasters

The journey begins with a bizarre absent-minded action slip committed by Professor Reason in the early 1970s - putting cat food into the teapot - and continues up to the present day, conveying his unique perceptions into a variety of major accidents that have shaped his thinking about unsafe acts and latent conditions. The journey begins with a bizarre absent-minded action slip committed by Professor Reason in the early 1970s - putting cat food into the teapot - and continues up to the present day, conveying his unique perceptions into a variety of major accidents that have shaped his thinking about unsafe acts and latent conditions. The country you have selected will result in the following: Product pricing will be adjusted to match the corresponding currency. The title will be removed from your cart because it is not available in this region. In the December issue of NVVK Info the review of James Reason's latest (last?) book has been published: English translation below: No need to introduce professor James Reason to safety professionals. At least, I hope I don't need to, and I sure hope that all have at least something from him (preferably either his seminal "Human Error" or "Managing The Risks Of Organizational Accidents
