

Download Aac Strategies For Individuals With Moderate To Severe Disabilities

SECTION 5: TYPES OF AAC DEVICES. OVERVIEW A critical component of the AAC device assessment process is to match the amount and kind of language in the user's brain to the amount and kind of language available in a particular AAC device so the individual can generate language as efficiently and effectively as possible. Augmentative and alternative communication (AAC) is an umbrella term that encompasses the communication methods used to supplement or replace speech or writing for those with impairments in the production or comprehension of spoken or written language. AAC is used by those with a wide range of speech and language impairments, including congenital impairments such as cerebral palsy ...Description: Children with severe and multiple disabilities – students with severe cognitive and communication impairments who may also have physical disabilities, sensory impairments and autism spectrum disorders – require instructional delivery that maximizes their learning opportunities and minimizes the barriers to attain desired learning outcomes. The Cartoon and Script Curriculum for Teaching Social Behavior and Communication: Using Visual Strategies to Support Behavioral Programming for Individuals with ASD.
