

# Download Blue Point Manual Switch Machine

The Ultimate Manual Turnout Control The Blue Point Switch Machine is easy to install and is actuated by a simple push rod to your layout's fascia. The adjustable throw rod holds the switch points in positive contact with the running rails to prevent derailments. A DPDT snap-action toggle switch inside the compact plastic housing changes electrical connections to the turnout frog to prevent ... We've designed the Blue Point™ Turnout Control to operate turnouts in scales from N through O. The electrical contacts are double pole, double throw (DPDT) rated at 5 amps, so they have plenty of capacity to power a frog or just about anything else you'll want to drive.

DPDT Switch Diagram The picture on the right has two diagrams. New Rail Models 40022 Blue Point Flex Link Starter Kit. The starter kit contains everything you need to connect ONE Blue Point machine (sold separately) to a wooden knob on your fascia for manual operation of a turnout. 1 - Wood knob, pre-drilled 1 - 2-56 screw & washer to attach the knob to the... Blue Point Switch machine/ turnout controller. Posted by scrapiron on Tuesday, March 13, 2012 1:02 AM Hello. This is my first post here. ... I have used Blue point manual control, a box of 12 but switched to Fastrack Bullfrog, less expensive and bullet proof anyway; to control them I use baguette to be welded for blowtorch guided in small rings ...
