

Download Cincinnati Press Brake Parts Manual

Press force: 600, 4,000 kN Folding length: 1,250, 6,050 mm. Machine frame and male (upper) die Rigid design integrates decades of experience Male die with extra-long high-precision dual block guides Working area Long stroke, large throat, and spacious working area allow extensive bevelling operations ...Gentlemen, I recently acquired a mechanical press brake for my home shop. I just kind of got started selling a few things and I would like to make some small things this summer to sell and for my home. I was looking at small press brakes for my fabrication shop. Does any one have any thoughts or experience with the Bantam 12 ton air powered brake listed below. KD Capital Equipment offers a range of fabrication machinery water jet machines including press brakes plasma tables and used CNC lasers
