Generac GTS transfer switches feature status lights that indicate switch position and source status, a programmable weekly exerciser, independent voltage pickup and dropout adjustments, and utility monitoring to protect against utility phase loss conditions. A variety of automatic home standby transfer switches are available for use with Generac automatic home standby generators. They transfer power automatically to the generator source, and switch back to utility power when it is restored. • When an automatic transfer switch is installed for a standby generator set, the generator engine may crank and start at any time without warning. To avoid possible injury that might be caused by such sudden start-ups, the system's automatic start circuit must be disabled before working on or around the generator or transfer switch.
