Abstract: Creating work environments that sustain open and supportive communication positively influence teamwork, staff satisfaction, and improved patient quality and safety. The Situation, Background, Assessment, and Recommendation (SBAR)-collaborative communication evidence-based practice (EBP) study described in this article introduced collaborative communication integrating SBAR ...Division of Adolescent and School Health, National Center for Chronic Disease Prevention and Health Promotion The material in this report originated in the National Center for Chronic Disease Prevention and Health Promotion, Ursula E. Bauer, PhD, Director Corresponding preparer: Sarah M. Lee, PhD ...Cerebral palsy (CP) is a group of permanent movement disorders that appear in early childhood. Signs and symptoms vary among people and over time. Often, symptoms include poor coordination, stiff muscles, weak muscles, and tremors. There may be problems with sensation, vision, hearing, swallowing, and speaking. Often, babies with cerebral palsy do not roll over, sit, crawl or walk as early as ...Synopsis There are around 200,000 healthcare-associated infections (HAIs) in Australian acute healthcare facilities each year. This makes HAIs the most common complication affecting patients in hospital. As well as causing unnecessary pain and suffering for patients and their families, these adverse events prolong hospital stays and are costly to the health system.
