News from Voith Turbo: Self-contained CLSP servo drive 2nd Quarter 2018, Electrical switching & drive systems & components, Voith Turbo. Voith's new self-contained Closed Loop 4Q Pump (CLSP) servo drive is a hydraulic linear axis from the company's range of self-contained drives. A propeller is a type of fan that transmits power by converting rotational motion into thrust. A pressure difference is produced between the forward and rear surfaces of the airfoil-shaped blade, and a fluid (such as air or water) is accelerated behind the blade. Propeller dynamics, like those of aircraft wings, can be modelled by Bernoulli's principle and Newton's third law. The Machinery Page. On this page you will find Martin's Marine Engineering Page - [www.dieselduck.net](http://www.dieselduck.net)'s collection of articles, papers, reports and programs on various machinery and practices found on commercial ships. This chapter provides an overview of the main and auxiliary machinery and equipment found on ships. Machinery is often divided into the main or propulsion engines, electrical generation, systems such as electrical, piping, refrigeration and air conditioning, fire fighting and protection, deck machinery and cargo handling equipment, bow thrusters and stabilizers, instrumentation and control ...
