Nissan is known for reliable cars and trucks, and for producing some of the most exciting sports cars of all time. If the French do food, the Italians do fashion, the Germans do engineering and the Swiss do chocolate, then it would be fair to say that what the Japanese do that sets them apart from the rest of the world is technological innovation. The Nissan Silvia is the name given to the company's long-running line of sport coupes based on the Nissan S platform. Although recent models have shared this chassis with other vehicles produced by Nissan (most notably the European 200SX and North American 240SX in the S13 and S14 generations, and 180SX in the Japanese market), the name Silvia is interchangeable with the chassis codes.
