Chirality / k a ? ? r æ l ? t i ? / is a property of asymmetry important in several branches of science. The word chirality is derived from the Greek ????? (kheir), "hand," a familiar chiral object.. An object or a system is chiral if it is distinguishable from its mirror image; that is, it cannot be superposed onto it. Conversely, a mirror image of an achiral object, such as a sphere ... Chirality / k a ? ? r æ l ? t i ? / is a geometric property of some molecules and ions. A chiral molecule/ion is non-superposable on its mirror image. The presence of an asymmetric carbon center is one of several structural features that induce chirality in organic and inorganic molecules. The term chirality is derived from the Ancient Greek word for hand, ????? (kheir).
