

Download Principles And Practice Of Obstetric Anaesthesia

Obstetric anaesthesia is a specialised practice and covers the entire range of pain relief throughout normal labour as well as general anaesthesia for special procedures such as caesarian section. Whilst there is a specialist group based at main teaching centres who practise obstetric anaesthesia exclusively, the majority of anaesthetists are based at smaller hospitals where there will be no such specialist available. Provenance; from the Birmingham Medical Institute with its presentation bookplate, being presented by the Birmingham Hospital Saturday Fund. The principles and practice of obstetric anaesthesia all come down to learning and understanding how normal physiological changes, which occur in pregnancy, alter anaesthetic techniques. This book starts with a review of organisational issues surrounding provision of obstetric anaesthetic services and then looks at when things go wrong.
