

# Download Sap Ehs Occupational Health Configuration Guide

Use the Master Guide to get an overview of SAP EHS Management, its software units, and how it supports you from a technical perspective. The Master Guide is a planning tool that helps you to design your system landscape. Industrial Hygiene and Safety. The system settings for agent-relevant data are made in the Industrial Hygiene and Safety (EHS-IHS) component. For more information, see the Implementation Guide (IMG) for Occupational Health. If you are using Industrial Hygiene and Safety, you can also transfer entries from the injury/illness log to the incident/accident log. This tutorial explains about SAP EHS (ENVIRONMENT, HEALTH & SAFETY). A management system approach is a widely recognized best practice for effectively managing environment, health, and safety (EHS) risks and preventing incidents. EHS and quality management system frameworks, such as ISO 14000, OHSAS 18001, and ISO 9000, enable organizations to define how they will manage various types of ... Move beyond compliance to operate more safely and reliably. With the SAP Environment, Health, and Safety Management (SAP EHS Management) application, you can proactively identify, analyze, and mitigate environment, health, and safety (EHS) risks; manage chemicals safely; monitor industrial hygiene; and reduce your environmental impact.
